by the time you are learning something, anything its already out of date and I figure you won't get a job out of it anyway. I don't care what it is, its been that way for the last 30 years and the people at the top are elite rich who have extra powers then most. Its really getting that way, don't talk about what you do or what you work in is a dirty conversation that most people just don't care anymore.
